

## CCTV Installation & Troubleshooting (Home and Business Security Camera Installation, Troubleshooting & Parts)

***"What good is a security camera system if they steal the tapes or computer it records to?"***

We install and troubleshoot wireless and wired security camera systems, new and old. We do not drill holes in walls though. We recommend using low-cost, hi-res night-vision security cameras available at a very low cost, which hook up to a wired or wireless hub depending on your preference. You will be able to record all movement, or, a non-stop roll of all activity in your home or store/office.

We can broadcast this streaming video out to a secure (password protected) web site that you can even view on your SmartPhone or iPhone. **NO MONTHLY FEES!** Unlike the major home-security and internet providers, we do not charge you a monthly fee. For a free estimate, with or without parts, give us a call at (845) 204-8672.

Components Needed:

1) Cameras

If your running this off a computer you need:

-PCI-DVR card

-Desktop PC w/ a free PCI-slot (call if you don't understand. Most older and newer machines have this).

(your existing one or old one will likely be fine)  
and  
BNC Adapters

If you don't want to use a computer, you'll need: - An all-in-one CCTV DVR unit.

3) Software to allow you to view your cameras online (free software available)

4) Software to upload your videos to the net for long-term keeping, incase a theft steals your computer or CCTV DVR, you will still have the video of WHO DID IT! What good is a security system if they steal it? FTP allows us to take your videos and upload them AS THEY HAPPEN, to an off-site location even ANOTHER COUNTRY if you want, for as little as \$4/month.

---

For the do-it yourself-er that wants to do it themselves I recommend:

Complete System (Includes Cameras, all-in-one DVR, RCA Cables, Software, Remote Control, Power Cables)

We are in the process of building a page to provide you the items you need online, for now please call and we will provide them for you. Installation costs vary but we will beat any major local competition.

Westchester, Putnam, Rockland, NYC (No free ONSITE estimates for NYC customers due to commuting costs, call for a written one based on what you need).
